INTRODUCTION

This plan is designed to guide Rennebohm Hall staff members and University of Wisconsin-Madison Police Department (UWPD) personnel through various incidents. Because every scenario cannot be predicted, it is necessary to have a response plan that can be quickly adapted to events as they unfold. The following plan designates areas of responsibility and defines for Rennebohm Hall the administrative framework necessary to respond to incidents. The overall University response needs to be quick, professional, supportive, and meet the changing demands of the situation.

This plan is linked to the UW-Madison Crisis Response Plan. There are many circumstances in which facility managers and other University staff are simply notified of a situation and the UW-Madison Crisis Response Plan itself will not be activated (e.g. criminal acts that are not in progress but require reporting). If an incident is of a more significant nature, such as a major structure fire, UWPD's Manager-on-Call (MOC) will determine if the incident warrants the activation of the UW-Madison Crisis Response Plan.

ADMINISTRATIVE FRAMEWORK

The purpose of the plan is to create a healthy and safe environment for facility attendees, visitors and staff in a coordinated response for all emergencies. This is an “All Hazards” plan which provides staff with the direction necessary to respond to any incident, some of which are natural disasters, bomb threats and power outages. This plan augments and adds building-specific information and procedures that are NOT available in the UW-Madison’s Emergency Procedures Guide (flip guides) which are in numerous offices throughout campus. Facility managers should continuously be encouraging building occupants to have a guide available and to periodically review it. Additional guides are available through the Emergency Management Unit.

Rennebohm Hall Occupant Emergency Plan functions are:

- Provide a coordinated response to incidents occurring in the facility
- Provide particulars regarding what steps should be taken in the event of an emergency
- Identify specific routes of entry into and exit from the facility in response to emergencies
- Clearly designate assembly areas and shelter facilities where building occupants can gather to be accounted for.
- Ensure that the appropriate university departments are notified

If an incident occurs within or adjacent to this facility, the facility manager or designee are expected to provide a coordinated response to the incident and assist as outlined in this plan. They are expected to work with UWPD and other agencies to resolve the issue at hand.

This Occupant Emergency Plan shall be controlled by the facility director or a designated person to ensure appropriate updates, changes and reviews are incorporated in all distributed copies of the plan. A copy of this plan shall be maintained at the following locations:

- Josh Cutler Office #1205, Phone 608-262-2943
- Dean’s Office, Zoe Andrews #1126C, Phone 608-262-1414
- UW Madison Emergency Management

TRAINING, TESTING, EXERCISING, AND UPDATING THE PLAN

Facility occupants must be trained on this plan once it is completed. Emergency Management staff can assist with or facilitate this training process based on the preferences of the planners. Typically, for example, Emergency Management will train facility leaders who, in turn, are responsible for training the remaining occupants.

Shortly after OEP training, elements of this plan will be evaluated through an initial exercise to ensure that facility administrative, support and other personnel are prepared to respond appropriately in an emergency. Subsequent tests/exercises will be conducted annually by the facility with assistance of the Emergency Management Unit. Detailed evaluations of the exercise and After-Action Reports will be provided to the facility manager and the facility director after the exercises. If a real emergency occurs or if a drill is conducted without assistance from the Emergency Management Unit, the facility manager should contact EM for instructions and a template to document what actions were taken and what improvements need to be made. After-Action Reports will be kept on file along with the building's plan.

This plan will be updated biannually by the facility manager or designee in conjunction with the Emergency Management Unit. Again, plans may also be updated after a real situation if there are deficiencies that need correcting.

When a plan needs to be modified, either because of an exercise or it is time for a biannual update, a meeting will be scheduled with the facility manager and the UWPD Emergency Management representative to discuss the following issues:

1. Revision or changes to applicable state or federal regulations
2. Whether or not particular deficiencies were identified
3. If there was a substantive change in key university personnel or cooperation with outside agencies
4. If there were substantial physical changes (e.g. remodeling) of the facility and, if so, if that area was covered by this plan

The information contained in the final plan should be discussed and trained with every facility staff member to help reduce confusion during an emergency and to make other occupants of the facility aware of what they need to do when visiting this facility. New employees should be made aware of the Occupant Emergency Plan AND the Emergency Procedures Guide in their orientation session.

ROLES AND RESPONSIBILITIES OF BUILDING STAFF

In order to limit confusion during an emergency, it is important for all facility staff to know their roles and responsibilities during an emergency. All facility staff that serve a primary and backup role in facility management and operations should have their contact information, including after-hours information, included on a contact sheet. This contact sheet should also contain the staff titles and their supervisors. In addition, it should contain a description of what their responsibilities are in an emergency. This contact sheet should accompany the emergency plan.

Floors:

Sandro Mecozzi	262-7810	Tower Area Office - 7113
Doug Braun	890-2037	Tower Area Lab – 6206
Nicholas Kalogriopoulos	265-6229	Tower Area Office - 5109
Mary Hayney	265-4666	Tower Area Office - 4121
No people Mechanical Level		3 rd Floor
Lindsey Weigel	265-6234	2 nd Floor office - 2220
Julie Ethridge	265-0912	1 st Floor office - 1017
Josh Cutler	262-2943	1 st Floor office - 1205

EMERGENCY COMMUNICATION PLAN

When an unpredicted situation or condition exists, it will most likely be reported to the UW-Madison Police Department. Facility employees are instructed to dial 9-1-1 from a campus phone for emergencies and for non-emergencies dial 264-2677(4-COPS).

Note: Dialing 9-1-1 from a cell phone will connect you to Dane County 9-1-1 Dispatch. Apart from medical emergencies, ask the dispatcher to transfer your call to the UWPD Communications Center.

When you speak to a dispatcher remember to:

- STATE YOUR NAME
- PHONE NUMBER YOU CAN BE REACHED AT
- TYPE OF EMERGENCY
- EXACT LOCATION OF THE EMERGENCY IN THE BUILDING

The building manager or designee could also be notified of situations in their area or on campus in several ways through the UW Crisis Communication Plan. The building manager should follow their internal communication procedures for notifying the facility occupants of the perceived threat or emergency.

EMERGENCY EVACUATION PLAN

GENERAL FACILITY INFORMATION

The health and safety of facility attendees, citizens, and staff is the most important issue. Emergency plans are developed to ensure their safety.

In the event of an emergency, the facility manager or designee will be notified as quickly as possible of the situation and told what actions are taking place in response to the emergency. If the emergency warrants, the facility manager or designee may need to have staff remain on duty until the emergency is resolved.

Facility emergency response plans should address three possible evacuation scenarios.

1. **In-place evacuation (shelter in place)**: Keeping facility attendees, citizens and staff in place or in a particular shelter location for the emergency that has presented itself (examples: tornado, active shooter, or a threat inside/outside or in the vicinity of your building).
2. **Out of Building evacuation**: Movement of facility attendees, citizens, and staff out of building and relocating to an outside assembly point. A good example of this would be a fire.

Your facilities assembly point is:

- 500 Feet from the building
- Lot 85 2245 Observatory Drive
- Lot 76 2501 University Bay Drive
- Lot 60 801 Walnut Street
- HSLC
- School of Nursing

3. **Relocation to another Building evacuation**: Movement of facility attendees, citizens, and staff out of the entire facility to a designated off-site shelter facility. This may occur during an active shooter situation or a threat inside/outside or in the vicinity of your building during an emergency.

Your facility's off-site shelter facility is located at:

- Health Science Learning Center, 750 Highland Avenue

The facility's floor plans will be posted in plain view throughout the building, displaying exits, the best route(s) to evacuate the facility and shelter areas. The emergency evacuation plan should be tested at least annually. Emergency equipment should be tested at pre-determined intervals.

GENERAL PROCEDURES

In the event of an emergency, the facility manager or designee will be notified as quickly as possible of the situation and told what actions are taking place in response to the emergency. The building manager or designee will evaluate the emergency and give the necessary directions to the building occupants to keep them safe. If the emergency warrants, the facility manager or designee may need to have staff remain on duty until the emergency is resolved.

Rennebohm Hall wants occupants to consider the following procedures when taking actions during an emergency:

1. The facility manager, designee, or person near the incident will call 9-1-1 and indicate the need for assistance. Remember to use your Communication Plan (page 7 and Appendix A):
 - a. STATE YOUR NAME
 - b. PHONE NUMBER YOU CAN BE REACHED AT
 - c. TYPE OF EMERGENCY
 - d. EXACT LOCATION OF THE EMERGENCY IN THE BUILDING
2. Determine the appropriate type of evacuation based on the circumstances. It is likely further directions will be given by Dispatch or first responders.
3. If safe, the facility manager or designee will perform an overhead page (if available) via the fire panel located to alert building occupants of the imminent hazard and provide instructions to shelter-in-place or evacuate the building.
4. If there is an on-site evacuation, all facility attendees and staff members must report to the designated assembly area located at least 500 feet away from the building, if possible, unless otherwise directed by the Madison Fire Department or UWPD.
5. During the evacuation, facility attendees, citizens and staff should adhere to predetermined evacuation routes as much as possible. However, they should not hesitate to alter the designated route if it is unsafe.
6. All occupants should stay at designated shelter or assembly points until they are notified by emergency personnel or designated personnel to reenter the building.
7. The facility manager or designee should always be in contact with the Madison Fire Department or UWPD until they are notified by emergency personnel that it is OK for occupants to reenter the building.
8. If the building has areas of rescue assistance, the building manager or designee should check the fire panel for location and notify first responders.

EVACUATION FOR PEOPLE WITH DISABILITIES

Individuals who need assistance during an evacuation, even temporarily (due to broken leg, illness, etc.) should plan in advance. These individuals should identify, discuss and plan with someone who can assist them in leaving the building and /or who will inform emergency responders of their presence and where they are located so that further assistance can be provided. Rescue is the Fire Department's first priority.

Facility managers cannot know everyone and all their exact needs. It is important that everyone be aware of their own capabilities and limitations. During this planning process, facility managers are encouraged to share the following information with their building occupants via email. The emergency management staff member working with you will provide a template for this email.

PERSONAL EVACUATION PLAN CONSIDERATIONS:

- If you cannot evacuate for any reason, dial 911 and state your location. UW Police dispatchers will relay this information to first responders.
- Pre-plan so building managers and volunteers are aware of your needs during an evacuation. A plan can be devised with assistance from the FP&M's website:
- Inform your facility manager of your regular presence in the building and of your personal plan
- Familiarize yourself with the layout of buildings you regularly occupy. Read the Building Evacuation Routes posted in each building by the elevators.
- If there is no established plan with the facility you are in, request assistance and then give clear instructions on what the volunteer needs to do to assist you.
- Areas of Rescue Assistance (ARA)-Location(s): Near any Stairwell with large signs

Note: These alarms do NOT go to police dispatch. They are received only at the fire panel, WHICH WILL ONLY BE VIEWED IF THE FIRE ALARM IS ACTIVATED.

Rennebohm Hall has individual, personal evacuation plans in place. (If applicable, add individual plans to Appendix)

CONSIDERATIONS IF CONTACTING SOMEONE WITH A DISABILITY:

- Always ASK someone with a disability how you can help BEFORE attempting any rescue technique or giving assistance. Ask how they can best be assisted or moved, and whether there are any special considerations or items that need to come with them.
- Attempt a rescue evacuation ONLY if you have had rescue training, or the person is in immediate danger and cannot wait for professional assistance.
- People with disabilities should ask for assistance to the nearest exit, Area of Rescue Assistance, or to a room with a telephone and window. Note the room number.

FIRE EMERGENCIES

PROCEDURES

- Evaluate the situation as to the location of the fire within the facility, the size of the fire, and the nature of the fire. The nature of the fire is important in determining the proper response. The first thing to do is to evacuate the area and then decide whether to try to extinguish the fire. This should only take place if there is no imminent danger to the staff.
- If the fire is not controllable, activate the fire alarm. The UWPD Communications Center should be notified of the situation by dialing 9-1-1.
- If the fire is small and is not located in a room where facility attendees are present, a fire extinguisher may be used to put out the fire. This should only be done if the staff member responding to the fire has received the proper training. Also, the staff should not fight the fire if there is any imminent threat to their safety.
- If it can be done safely, designated personnel should attempt to check their area to ensure occupants have evacuated. Proceed to assembly points and attempt to conduct a head count.
- All occupants should stay at designated assembly points until they are notified by emergency personnel or designated personnel to reenter the building.
 - **Your Assembly Points are: 500 feet from building**

BUILDING INFORMATION

- Mapped emergency egress/escape routes will be posted throughout the building depicting the following:
 - Exits
 - Primary evacuation routes
 - Secondary evacuation routes
 - Accessible egress routes
 - The locations of emergency evacuation chairs
 - Manual fire alarm pull stations
 - Portable fire extinguishers (approximately every 75 feet in most labs)
 - Fire alarm annunciator and control panels
 - Emergency phone locations
 - The preferred and alternate means of notifying occupants of a fire for Rennebohm Hall
 - Pull Station
 - 911
- The normal route for Madison Fire Department vehicle access is Highland Avenue:
 - Building managers or designees must identify themselves to Madison Fire Department's command vehicle and/or UW-Madison Police Department's incident commander.
- Many buildings have major fire hazards associated with the normal use and occupancy of the premises, including maintenance and housekeeping procedures (Examples: Labs, Chemicals, etc.)

Rennebohm Hall Occupant Emergency Plan

- Rennebohm Hall has fire hazards listed below:
 - 1st Floor-1308, 1432 Solvent Storage rooms; Flammable solvent storage Acetone, Hexanes, Ethyl Ether, THF, Toluene, Ethyl Acetate, Isopropanol, Methanol, Ethyl alcohol
 - 7th floor- 7225 Solvent Purification Room 7225 high inventory of flammable solvents:
 - Hexanes, Ethyl Ether, Tetrahydrofuran, Ethyl Acetate
 - 7th Floor- 7227 Hydrogenation Room Hydrogen cylinders (2-3 tanks) extremely flammable
- All occupants should stay at designated assembly points until they are notified by UW-Madison PD, fire personnel, or building manager or designee to reenter the building.
 - **Your Assembly Points are:**
 - Lot 60, 801 Walnut Street
 - Lot 85, 2245 Observatory Drive
 - Lot 76, 2501 University Bay Drive
 - HSLC
 - School of Nursing

WEATHER EMERGENCIES

Building manager or designee will monitor and alert the building of inclement weather if necessary. The building manager or designee will monitor the National Oceanic and Atmospheric Administration (NOAA) radio or television for weather updates. The building needs only to be notified of the inclement weather if it is affecting Dane County. The following are examples of inclement weather the building occupants could be notified of and, if necessary, told what to do:

DEFINITIONS

- **WATCH:** Issued to alert the public that conditions are favorable for the development of severe weather in and close to the watch area. These watches include details on the watch area and the length of time they are in effect
- **WARNING:** Issued by local weather offices to warn the public that severe weather has been sighted by storm spotters or has been indicated by radar. These warnings include details on where the weather condition is presently located and what communities are in the anticipated path of the weather condition

ALERT SYSTEMS

- NOAA Weather Radio/Monitor Locations:
 - Josh Cutler rm 1202
- Dane County Emergency Management Warning Systems website:
 - <http://em.countyofdane.com/warning>
 - You will receive a message requesting verification of your subscription. Upon verification, you will be subscribed to the system.
- Email – National Weather Service “Watches” and “Warnings” are automatically converted to email messages sent to everyone on Dane County’s Emergency Notification by Email system. This system is also used to disseminate other disaster warnings and emergency information.
 - To subscribe to this email service, send an email message to janda@co.dane.wi.us. Include the following information in the text of the message:
 - Your name or alias
 - The email address you wish to subscribe to the system
 - The type of device (PC, pager, PDA, etc.) that will receive the alert messaging
 - You will receive a message requesting verification of your subscription. Upon verification, you will be subscribed to the system.
- Local T.V. web channel options (sign up online)
 - www.channel3000.com
 - wkow.madison.com
 - www.nbc15.com
- Local Radio stations
 - Location of battery-operated radio: Building Manager office 1202

CONDITIONS AND RESPONSES

- Severe Thunderstorm
 - Be vigilant
 - Monitor for weather updates
- Tornado
 - Watch
 - Monitor weather conditions
 - Review shelter areas-posted maps or plan
 - Be prepared for changes in weather conditions
 - Warning
 - Monitor weather conditions if possible
 - During a Tornado warning, occupants should seek shelter in a designated shelter area which could include bathrooms, elevators, stairwells, basements, parking ramps, and interior hallways.
- Flooding
 - Seek shelter on high ground
 - Stay away from high voltage
 - Report problems to Building Manager
- Snow/Blizzard
 - After assessing the impending or current severe weather conditions, it is the responsibility of the University's Chief Executive Officer (Chancellor) to determine if any classes or services will be postponed or suspended.
 - Employee discretion and compensation guidelines can be found in UWS 16.04, Inclement Weather Guidelines for Classified Employees.

PUBLIC ADDRESS

Rennebohm Hall has a Public Address system from which announcements can be made. The PA is located on the fire panel room 1103.

- Bomb Threat
 - "Attention, may I have your attention. We have detected an abnormal condition in our facility. We will be evacuating the building."
- Fire Alarm
 - "Attention, may I have your attention. The building fire alarm system has detected an abnormal condition. Please standby for further instructions"
 - "Attention, may I have your attention. The building fire alarm system has detected an abnormal condition. Please evacuate the building."
- Fire Alarm – All Clear
 - "Attention, may I have your attention. A problem has been resolved. You no longer have to evacuate the facility. Thank you for your cooperation. We apologize for the inconvenience."
- Severe Weather

Rennebohm Hall Occupant Emergency Plan

- “Attention, may I have your attention. We have received a report of severe weather in our area. We need to move to the lower level of our facility.”
- Severe Weather – All Clear
 - “Attention, may I have your attention. It is now safe to return to your office. Thank you for your cooperation. We apologize for the inconvenience.”
- Power Outage
 - “Attention, may I have your attention. We are experiencing a power outage. Please remain in your office while we try to correct the situation.”

RESPONSE TO ILLNESS OR INJURY

The following information is general response to injuries, illness or death that may present itself in your facility. In every situation, staff members should evaluate the situation, make sure your safety is not compromised, and act on it according to your training. Always remember, if at any time you or anyone else does not feel safe in the situation call 9-1-1 immediately.

MEDICAL PROBLEMS

If an occupant of Rennebohm encounters a person who appears to be injured or ill, they should do the following (this could depend on roles/responsibilities):

- If the illness or injury does not require immediate medical attention, but requires a doctor's care, the facility manager or designated staff member can encourage the ill or injured person to seek medical attention.
- If the person is unresponsive or the severity of their conditions is unknown, contact 9-1-1 or UW-Madison Police Department Non-Emergency number 264-2677
 - a. When speaking to the dispatcher:
 - STATE YOUR NAME
 - EXACT LOCATION IN THE BUILDING
 - TYPE OF PROBLEM (dispatcher will ask you a series of questions)
 - TELL DISPATCHER IF THERE IS A PERSON TO MEET EMERGENCY PERSONNEL AND AT WHAT ENTRANCE THEY WILL BE WAITING.
 - b. Contact persons supervisor
 - c. Contact building manager
 - d. Contact persons family if requested
 - e. Keep person calm
 - f. Do not attempt to move the person unless they are in greater danger if they stay in place.
 - g. If the illness or injury was the direct or indirect result of faulty equipment, unsafe work conditions, not wearing the required safety equipment, etc, then the situation should be reviewed and rectified as soon as possible to prevent repeated incidents

NOTE: If you are not sure whether the situation is an emergency or not, never hesitate to use the emergency number 9-1-1

DEATHS

If an obvious death occurs (if the status of the person is unknown, those with CPR training should begin CPR) in the facility, police priorities will be to contain the scene for a death investigation. In either case, staff should promptly:

1. Call 9-1-1
2. Shield the body from public view. Do not touch or move the body unless necessary to determine responsiveness.
3. Contact the building manager
4. Appropriate staff members should move all facility attendees, citizens and staff to another location in the facility if the work area is being used for the death investigation
5. The facility attendees, citizens and staff in the immediate area should only be told what is essential for them to know about what has occurred. Staff members should offer any comfort or counseling needed to each other
6. If a news reporter is aware of the situation and asks for information, they should be referred to UWPD or UW Communications for a statement
7. Upon request from the police and/or coroner, provide emergency contact information for the deceased's family.

MISSING OR ABDUCTED FACILITY ATTENDEE OR STAFF PERSON

The following information is a general response to an employee, student, or visitor missing or abducted from the facility during business hours. There are at times when other circumstances, such as not reporting to work for several days without calling in sick, overdue from vacation, etc. when an employee is missing from work and someone is concerned about that person's welfare. In those cases, you should handle them via your department's policy.

MISSING ADULT

- If staff, student, visitor or other facility attendee is not accounted for contact with the building manager and set up a search of the facility inside and outside with help of volunteers.
 - *However, if there is any indication the person may have been abducted, has recently been threatened or depressed, may have a medical emergency, or any other concerns, contact police **immediately** and then begin searching while police are on the way.*
- The supervisor should contact the person's emergency contact if available
- If the person is not located after the building and area has been searched, contact UW-Madison Police Department, continue searching and making calls to family and friends
- Obtain as much information as you can from the last person who had contact. Be prepared to provide some initial physical and clothing description to the police:
 - Clothing description
 - Description of anything they may have said
 - Any notes or other indicators left behind
 - Sex
 - Race
 - Height
 - Weight
 - Hair color
 - Approximate age

MISSING CHILDREN

- If a child disappears, particularly if under suspicious circumstances, **immediately call UW-Madison Police Department and** then contact the building manager
- Volunteers can then be contacted to immediately mobilize to look for the missing child.
- When you call law enforcement, provide:
 - The child's name
 - Date of birth
 - Height
 - Weight
 - Any other unique identifiers such as eyeglasses and braces
 - What clothing he or she was wearing
 - How long has the child been missing
- If appropriate, the police will issue an Amber Alert.

RESPONSE TO UTILITIES AND MAINTENANCE EMERGENCIES

The following section is a general response to problems that may present themselves in the facility. As always follow your roles and responsibilities for reporting emergencies or other issues with your building.

GAS LEAK

In its natural state, natural gas is odorless and colorless. For easy detection an odorant is injected into the gas before it is inserted into the distribution system. The odorant is so highly concentrated that even the smallest amount of natural gas can be detected.

The odorant gives off a foul smell, reminiscent of rotten eggs or sulfur. Any odor of natural gas inside your building may indicate a leak.

HERE ARE SOME STEPS TO TAKE IF A NATURAL GAS LEAK IS DETECTED:

1. **Do not use your telephone.** This includes cellular phones and all types of portable communication and electronic devices that have a battery. These can spark and create a source of ignition.
2. **Do not** light matches or create any other source of ignition.
3. **Do not** operate **ANY** electrical switches, including lights, on or off. This could create a spark, which could ignite the gas.
4. Any possible flame source should be extinguished
5. Open windows and doors.
6. Evacuate everyone from the area.
7. Call UW-Madison Police Department
 - a. STATE YOUR NAME
 - b. EXACT LOCATION IN THE BUILDING
 - c. TYPE OF PROBLEM
 - d. Tell the dispatcher if there is a person to meet emergency personnel and at what entrance they will be waiting.
8. All occupants should stay at designated assembly points until they are notified by emergency personnel or designated personnel to reenter the building
9. If your building does not have a natural gas supply and you smell natural gas coming from an area you should notify UW-Madison Police Department to investigate

If the odor of escaping gas is strong inside or outside, or if the flow of gas from broken or disconnected gas lines can be heard or if a break is seen, follow the tips listed above. If you are trained, turn off the gas valve with a pipe wrench or other suitable tool. If the leaking gas ignites, do not attempt to put out the flames. Immediately call 9-1-1.

POWER FAILURE

Things to consider if there is a power failure in your building:

- The building manager or designee should be notified promptly of the power failure.
- The facility manager or designee should contact the local power company
 - Madison Gas and Electric: 608-251-8300 (general number)
 - Madison Gas and Electric: 608-252-7111(outages/downed wires)
 - Physical Plant: 263-3333
- A battery-powered radio is located in Room 1202. (Also, for weather emergencies)
- Rennebohm Hall has a back-up/emergency generator
 - Location: NE Corner of Building outside (NOTE must go outside to reach generator)
 - Operating instructions: Starts on own
 - People authorized to operate: UW Electricians

PLUMBING

Things to consider if there is a plumbing problem in your building:

- The building manager or designee should be notified promptly of the plumbing problem. An example might include overflow toilets causing flooding in building.
- The building manager or designee should contact the facilities plumbing contractor
 - UW-Madison Physical Plant (Physical Plant Customer Service): 608-263-3333

LOSS OF WATER

Things to consider if there is a loss of water in your building:

- The facility manager or designee should be notified promptly of the water loss
- The water loss could be a result of a plumbing problem, loss of power or something else. The facility manager or designee should contact the local Public Works
 - UW-Madison Physical Plant (Physical Plant Customer Service): 608-263-3333

TELEPHONE SERVICE

Things to consider if there is a telephone service problem in your building:

- The facility manager or designee should be notified promptly of the telephone service loss.
- The facility manager or designee should contact the telephone company:
 - SBC at 1-800-257-0902

HEAT OR AIR CONDITIONING

Things to consider if there is a problem with the heat or air conditioning in your building:

- What time of year is it?
 - **Buildings HVAC get switched at different times depending on what type of heat/cool system they have.**
- The facility manager or designee should be notified promptly of the loss of heat or air conditioning if it is not during the seasonal change over period. If during the seasonal change over period notify the building manager so they can find out when the building is scheduled for change over.
- The building manager or designee should contact the appropriate service/maintenance provider:
 - UW Physical Plant (Physical Plant Customer Service): 608-263-3333

KEYS OR ACCESS CONTROL

Things to consider if there is a problem with keys or access control system in your building:

- The building manager and/or access control administrator should be notified promptly of any problem with locks, keys, access control panels and access control cards.
- For lock and key issues on non-access control doors, the building manager should contact the UW-Madison Locksmith Shop (Physical Plant Customer Service): 263-3333
- For problems with access control doors or the control panel the building manager should contact FP&M's Computer Support Help Desk at 265-6900
- Problems with or loss of your access control card should be reported to UW-Madison Police Department:
 - Business Hours: Call 265-3279 or email access@mhub.uwpd.wisc.edu
 - After Hours: Call UWPd Dispatch at 264-COPS (2667)
- If a lockdown of the facility is required, the building manager or designee will perform this task under the direction of the UW-Madison Police Department.

Access Control:

- Facility has exterior door electronic locking capabilities on all doors
- Facility Access Control Administrator
 - Name: Josh Cutler
 - Room Number: 1202
 - Phone Number: 262-2943
- Alternate Access Control Administrator
 - Name: Liz Funk Smith
 - Room Number: 1218
 - Phone Number: 890-2434
- The facility has emergency lockdown capabilities.

RESPONSE TO HAZARDOUS CHEMICAL INCIDENT

This section provides general response guidelines to a hazardous chemical spill, leak or release in or outside of a campus building. When handling hazardous materials, be sure to follow all available safety and product guidelines, particularly the Materials Safety Data Sheets (MSDS). If your facility contains any hazardous materials, a Laboratory Emergency Information form, containing hazard information and contact names to help emergency responders, must be posted on the door(s). **Hazardous chemical spills should only be handled by people who have had appropriate training in how to safely handle the substances in question.**

UW-Madison's Environment, Health & Safety Department (EH&S) will be glad to assist in answering questions (Help Line: 265-5518 or <https://ehs.wisc.edu/labs-research/chemical-safety/>) EH&S is also responsible for regulatory reporting requirements and must be notified of any spill, leak or release.

If the identity of the spilled chemical is known and clean up can be attempted without risk, begin clean up and send another person to the facility manager or safety officer for assistance.

In all other cases, UW-Madison's Environment, Health & Safety Department uses a ranking system to not only help guide their department's initial response procedures, but to provide corresponding personal response and decontamination guidelines.

Hazardous material incidents are roughly categorized as major spill/high hazard, minor spill/low hazard or unknown. This is based on a combination of substance, quantity, area and potential dangerousness. Everyone in the workplace should be aware of any potential hazards in their area and be trained accordingly.

BASIC PROCEDURES

- Evacuate the area immediately and go to a safe place
- Do NOT attempt to respond to an unidentified spill
- Extinguish all open flames
- Close doors and fume hoods
- Avoid any action that might create a spark (do NOT turn lights on or off)
- Do not attempt to rescue an injured person unless you are protected from the hazard and you are sure of your safe return
- Do not attempt to rescue anyone who has passed out due to fumes
- Call 9-1-1 and provide the following information:
 - YOUR NAME
 - PHONE NUMBER YOU CAN BE REACHED AT
 - EXACT LOCATION OF THE EMERGENCY IN THE BUILDING
 - TYPE OF EMERGENCY, ANY INJURIES OR SYMPTOMS INVOLVED AND ANY HAZARDOUS MATERIALS INVOLVED IF KNOWN
- Designate someone to meet emergency responders
- No one should enter the facility until authorized by emergency responders

PERSONAL DECONTAMINATION PROCEDURES

- **Quickly** remove all contaminated clothing while using the safety shower or other available sources of water.
- **Flood** the affected body area in cold water for at least 15 minutes.
- If eyes are involved, **check** for contact lens and flood eyes for at least 15 minutes
- **Remove** all jewelry to facilitate removal of any residual material
- **Call UWPD at 9-1-1 and get medical attention promptly.** Even if there is minimal contact and someone feels OK, they should be instructed to seek medical treatment.

RESPONSE TO THREATS

The following section is a general response to some threats that may present themselves either inside or outside of the facility. We are encouraging faculty, staff, students and visitors to take a heightened awareness of anything suspicious, odd or unusual in the area they are in. This could include suspicious people, suspicious packages, boxes, backpacks, and building repair issues. People attending this facility know the area best and can articulate discrepancies that could avert a potentially threatening situation. Staff should only address situations when it is clear their safety is not compromised.

ALL threats should be taken seriously and reported. “In order to determine whether something is an isolated incident or cause for concern it is necessary to share information in a consistent manner, check for patterns and determine next steps.” (Excerpt from UW System President’s Commission on University Security, July 2007)

THREATS: VERBAL/PHYSICAL

- Types
 - In-person
 - Written
 - Telephone
- Warning Signs
 - Poor uncharacteristic performance
 - Excessive absences or tardiness
 - Reduced motivation
 - Irritability
 - Angry outbursts or tearfulness
 - Intense emotions
 - Inappropriate responses
 - Strained interpersonal relations
 - Substance abuse
 - Isolating behavior/low self esteem
 - Change in personal hygiene or dress
 - Evidence of depression or stress
 - Hyperactivity/difficulty concentrating
- What to do if you observe warning signs
 - Talk with a trusted colleague about the situation
 - Call counseling services(students) or Employee Assistance Office(faculty/staff) for advice
 - Speak with the person privately
 - Remain calm/keep your composure
 - Actively listen to what the person is saying
 - Communicate understanding not sympathy
 - Don’t make judgments or establish blame
 - Set clear boundaries/behavioral expectations
- Note: **NEVER** make promises you can’t keep, particularly about confidentiality. You may be obligated to report information if you believe the person is a danger to themselves**

Rennebohm Hall Occupant Emergency Plan

- Indicators that the situation may escalate:
 - **Justification to use violence**: The person may have been suspended, disciplined or terminated
 - **Lack of alternatives**: The person appears to have a sense of hopelessness and does not see any alternatives in the situation
 - **Consequences**: The person believes their violent or disruptive actions outweigh the consequences
 - **Ability**: The person may have the resources or physical capability to perpetrate violence, which may or may not include access to weapons
- What to do if the situation does escalate:
 - If the person is present and violence or a disruption occurs, immediately call 9-1-1 and:
 - STATE YOUR NAME
 - PHONE NUMBER YOU CAN BE REACHED AT
 - TYPE OF EMERGENCY
 - EXACT LOCATION OF THE EMERGENCY
 - SOME DESCRIPTION OF THE PERSON & DIRECTION OF TRAVEL (if they left the area)
 - If the person is not present, but exhibits these indicators, immediately call: **9-1-1**

BOMB THREATS

1. Any bomb threat should be taken seriously and treated as a real situation until proven otherwise
2. Any suspicious packages or letters should be reported to UWPD who will advise whether to evacuate the building
3. If evacuation is necessary, it should be out of the facility and to your assembly points. As you are evacuating, take note of any information, such as unfamiliar objects, that may be important to responding law enforcement officers. Once you reach your assembly point, make sure that information is passed on to the facility manager(s) and responding officers.
4. Leave the windows and doors open to minimize shock damage from a possible explosion.
5. Upon arrival of UW-Madison Police Department and other assisting agencies, the facility manager or designee will contact the Incident Commander and pass along any information obtained and answer any questions that the Incident Commander may have.
6. All occupants should stay at designated assembly points until they are notified by emergency personnel or designated personnel to reenter the building.
7. See appendix F for more detailed Bomb Threat procedures and checklist. This same information can also be found in the Emergency Procedures Guide.

ACTIVE SHOOTERS

An active shooter is a person who is actively engaged in killing or attempting to kill people in a populated area; in most cases active shooters use firearms and there is no pattern or method to their selection of victims. These situations are dynamic and evolve rapidly, demanding immediate deployment of law enforcement resources to stop the shooting and mitigate harm to innocent victims. Not all situations can be planned for, but there are some things that you can think about before a situation occurs that may help you under stressful conditions. Here are some things to consider:

- Nobody just SNAPS. A mass casualty killer ALWAYS tells someone or gives clues ahead of time. Look for the signs and indicators listed in verbal threats (Section A)
- For this type of killer, violence becomes the only possible recourse for their perceived grievances
- Survival Strategies in the event of an Active Shooter:
 - Study your surroundings before something happens
 - Where are your exits? Can the door be locked? What would work as a barricade? Do the windows open?
 - Have a plan of action for rooms/buildings you frequent
 - Where would you run? How would you hold a barricade? Would you live if you jumped out a window?
 - Establish an internal safe room
 - Be prepared to call 9-1-1 when it's safe for you to do so.
 - Remember **RUN-HIDE-FIGHT**

RUN

- Get out and away from area
- Call 9-1-1 to alert police to the shooter's location. If you can't speak, leave the line open. Report as much detail as possible about your location and about the shooter(s)

HIDE

- If you can't get out, find a safe place to hide
- If you are in a room you cannot leave, barricade the door to keep the shooter out
- Close and lock all doors and windows, shut blinds, turn off all lights, get down on the floor &/or behind adequate cover (i.e. concrete walls, thick desks, filing cabinets)

FIGHT

- If there is no way out, your only choice may be to fight back and take out the shooter. Remember you are fighting for your life, so commit fully to your actions.

WHAT TO EXPECT FROM RESPONDING POLICE OFFICERS AND THINGS TO CONSIDER:

- Police officers responding to an active shooter are trained to immediately proceed, in small teams, immediately to the area in which shots were last heard

Rennebohm Hall Occupant Emergency Plan

- Their purpose is to stop the shooting as quickly as possible so they will NOT stop to aid injured people
- Remain calm, do as the officers tell you, and do not be afraid of them.
- Put down any bags or packages you may be carrying and keep your hands visible at all times
- If you know where the shooter is, tell the officers
- Before un-securing an area (i.e. unlocking your room to let others in):
 - Consider continued risk of attack. The shooter will not stop until they are engaged by an outside force and there may be more than one. The shooter may also pretend to be a police officer to lure people out of rooms
 - Attempts to rescue people should only be attempted if it can be accomplished without further endangering the people inside a secured area
 - Consider the safety of masses vs. the safety of a few

HOSTAGE SITUATION

IF YOU HEAR OR SEE A HOSTAGE SITUATION

- Immediately remove yourself from any danger
- Immediately notify the University of Wisconsin-Madison Police Department by dialing 9-1-1 or 264-2677
- Be prepared to give the Police Communications Officer the following information
 - Location and room number of incident
 - Number or possible hostage takers
 - Physical description and names of hostage takers, if possible
 - Number of possible hostages
 - Any weapons the hostage takers may have
 - Your name
 - Your location and phone number

IF YOU ARE TAKEN HOSTAGE

- Remain calm, be polite and cooperate with your captors
- DO NOT attempt to escape unless there is an extremely good chance of survival. It is safer to be submissive and obey your captors

Rennebohm Hall Occupant Emergency Plan

- Speak normally, DO NOT complain, avoid being belligerent and comply with all orders and instructions
- DO NOT draw attention to yourself with sudden body movements, statements, comments or hostile looks
- Observe the captors and try to memorize their physical traits, voice patterns, clothing or other details that can help provide a description later
- Avoid getting into political or ideological discussions with the captors
- Try to establish a relationship with your captors and get to know them. Captors are less likely to harm if they respect you
- If forced to present terrorist demands to authorities, either in writing or on tape, state clearly that the demands are from your captors. Avoid making a plea on your own behalf
- Try to stay low to the ground or behind cover from windows or doors, if possible

IN ANY RESCUE SITUATION

- DO NOT RUN. Drop to the floor and remain still. If that is not possible, cross your arms, bow your head and stand still. Make no sudden moves that a tense rescuer may interpret as hostile or threatening
- Wait for instructions and obey all instructions you are given
- Do not be upset, resist, or argue if a rescuer isn't sure whether you are a suspect or a hostage
- Even if you are handcuffed and searched, DO NOT resist. Just wait for the confusion to clear
- You will be taken to a safe area, where proper identification and status will be determined

See Appendix D for additional shelter in place and lockdown procedures.

APPENDIX A

EMERGENCY RESPONSE GUIDE

APPENDIX B

EMERGENCY CONTACT LIST QUICK REFERENCE SHEET

FACILITY INFORMATION

Name: Rennebohm Hall

Address: 777 Highland Avenue

City, State, Zip Code: Madison, Wisconsin 53706

Telephone number: 608-262-2943

Agency/Company	Name of Contact	Telephone Number
Facility Manager	Josh Cutler	Office: 262-2943 Cell: 608-215-9372
Alternate Contact for Facility Manager	Liz Funk Smith	Office: 608-890-2434
Fire/Police/Ambulance		9-1-1
UW Police Non-Emergency		264-COPS (264-2677)
Poison Control		800-222-1222
Dane County Public Health Department		266-4225 or 255-2345
UW Physical Plant – Tradesmen		263-3333
UW Safety Department		265-5000
MG &E		251-8300
UW Health Services Health consultant		265-5600

APPENDIX C

EVACUATION QUICK REFERENCE SHEET

IN-PLACE EVACUATION (A.K.A. SHELTER IN PLACE)

Keeping facility attendees, citizens and staff in place or in a particular shelter location for the emergency that has presented itself (examples: tornado, active shooter, or a threat inside/outside or in the vicinity of your building).

OUT OF BUILDING EVACUATION

Movement of facility attendees, citizens, and staff out of building and relocating to an outside assembly point. A good example of this would be a fire.

Your facilities assembly point is:

- 500 Feet from the building
- Lot 85 2245 Observatory Drive
- Lot 76 2501 University Bay Drive
- Lot 60 801 Walnut Street

RELOCATION TO ANOTHER BUILDING EVACUATION

Movement of facility attendees, citizens, and staff out of the entire facility to a designated off-site shelter facility. This may occur when there is inclement weather during an emergency.

Your facility's off-site shelter facility is located at:

- Health Sciences Learning Center, 750 Highland Avenue
- The host facility should be consulted on what arrangements need to be made to support the facility attendees and the estimated time of arrival of the evacuation party
- Facility director or designee should notify UWPD of where the evacuation party is relocating and where their facility attendees can be picked up if necessary
- The facility director or designee should have pre-designated locations for emergency evacuation chairs for wheelchair users if applicable

APPENDIX D

ACTIVE SHOOTER

SHELTER-IN-PLACE RESPONSE GUIDE

Use the ESCAPE strategies

RUN

- a. Get out and away from area
- b. Call 9-1-1 to alert police to the shooter's location. If you can't speak, leave the line open. Report as much detail as possible about your location and about the shooter(s)

HIDE

- c. If you can't get out, find a safe place to hide
- d. If you are in a room you cannot leave, barricade the door to keep the shooter out
- e. Close and lock all doors and windows, shut blinds, turn off all lights, get down on the floor &/or behind adequate cover (i.e. concrete walls, thick desks, filing cabinets)

FIGHT

- f. If there is no way out, your only choice may be to fight back and take out the shooter. Remember you are fighting for your life, so commit fully to your actions.

GENERAL QUICK RESPONSE GUIDE

- Secure immediate area
- Lock and barricade doors
- Turn off lights
- Close blinds
- Silence cell phones
- Block windows
- Turn off radios and computer monitors
- Keep occupants calm, quiet, and out of sight
- Keep yourself out of sight and take adequate cover/protection i.e. concrete walls, thick desks, filing cabinets (cover may protect you from bullets)
- Place sign in exterior windows to identify the location of injured persons

WHAT TO REPORT TO THE UNIVERSITY OF WISCONSIN MADISON POLICE DEPARTMENT

- Your specific location – building name and office/room number
- Number of people at your specific location
- Injuries – number injured, types of injuries
- Assailant(s) – location, number of suspects, race/gender, clothing description, physical features, type of weapons (long gun or handgun), backpacks, shooters identity if known, separate explosions from gunfire, etc.

APPENDIX E

EMERGENCY SUPPLIES, FIRST AID KIT CONTENTS/LOCATIONS

The facility should contain at least a 24-hour emergency supply of the following items:

The facility will have first aid kit available on:

- 4th floor through 7th floor, two per floor in research corridors 1/3 of way, along the hall, on the east wall
- 2nd floor in rooms 2313 and 2341
- Small first aid kits also located in offices 1202, 1126, 1011, 1234, 2220, 2502, 6117 and in each research laboratory

The following items are located in the first aid kits for use in emergency situations:

- Two pairs of latex or sterile gloves
- Sterile dressings to stop bleeding
- Cleansing agents, such as soap or antibiotic wipes, to disinfect an area
- Antibiotic ointment to prevent infection
- Adhesive bandages
- Scissors and tweezers

APPENDIX F

EMERGENCY NOTIFICATION CALL LIST

(contact in order listed)

1. Building Manager

Primary	Josh Cutler	(W) 262-2943	(H) -----	(C)608-215-9372
---------	-------------	--------------	-----------	-----------------

2. Back-up Building Manager

Back-up	Rich Stanek	(W) 263-6655	(H) -----	(C) 608-279-5201
---------	-------------	--------------	-----------	------------------

3. Associate Dean

Primary	Liz Funk Smith	(W) 890-2434	(H)	(C) 608-712-0267
---------	----------------	--------------	-----	------------------

For facility related problems you must first call the UW-Madison Police Department at 264-2677, and they will contact the physical plant employee on-call.

APPENDIX G

BOMB THREAT PROCEDURES

If you should receive a bomb threat by telephone, there are some things to keep in mind that can be helpful to you:

1. **Remain Calm.** When a bomb threat is received, the person taking the call must remain calm and obtain as much information as possible.
 - **DO NOT put the caller on hold**
 - **DO NOT attempt to transfer the call**
 - **DO NOT hang-up even after the call has concluded.** Leaving the line open will aid the telephone company in tracing the last incoming call
2. The person taking the call will immediately notify the highest-ranking staff person in the office area, with the use of another telephone, preferably while the caller is on the initial telephone.
3. Pay close attention to the caller and his/her words, to see if:
 - Does the caller have any distinguishing voice characteristics such as an accent, stuttering, mispronunciation, or using a microphone, a recorder or other device?
 - Is the caller angry, excited, irrational, or agitated?
 - Is the caller a man or woman, young, middle-aged, old?
 - If you have caller ID, please note the phone number of the caller
4. Listen for background noises (traffic, train whistle, music, radio, TV, children, etc.).
5. It is important that you document all that you know and hear. This should include filling out the **Bomb Threat Checklist**.

CHECKLIST – WHEN YOU RECEIVE A BOMB THREAT

The Checklist should be immediately available (under your phone or other accessible location.)

All personnel should become familiar with the following Bomb Threat Checklist. It can become the only means of determining what is happening and may be the only way to determine the validity of a call and could aid in identifying and apprehending the caller.

After receiving a bomb threat of any kind, immediately contact the UW Police at 911. The UW Police Department will notify all appropriate officials and will assist in the evacuation as needed.

Rennebohm Hall Occupant Emergency Plan

BOMB THREAT CHECK LIST

(STAY CALM AND COLLECT ALL THE INFORMATION YOU CAN)

NAME OF PERSON

Who Received Threat: _____

DATE & TIME _____ A.M.

Threat Received: _____ P.M.

How was THREAT REPORTED: Telephone _____ E-mail _____ Give Phone Number (include Area Code): _____

In Person _____ Voice-Mail _____ Fax _____

By MAIL Carrier (e.g. FED EX): _____ Campus _____ US Mail _____ Courier _____

LOCATION THREATENED: _____

(Give name of Bldg/dept/site/agency, etc.) _____

EXACT WORDS USED to make the threat (if possible): _____

QUESTIONS TO ASK THE PERSON MAKING THE THREAT:

1. WHEN IS THE BOMB GOING TO EXPLODE? _____
2. WHERE is the bomb located? _____
3. WHAT kind of bomb is it? _____
4. WHAT does it look like? _____
5. WHO placed the bomb? _____
6. WHY was the bomb placed? _____
7. Where are you calling from? _____

DESCRIPTION OF THE CALLER'S VOICE (Give Identity if known):

Caller's Name: _____ Male _____ Female _____
(man) (woman)

Young _____ Old _____ Middle-Aged _____ Accent _____ Race _____

Tone of voice (e.g. excited, calm, angry, loud, stuttered) _____

Was Voice-Language: Taped _____ Well-spoken _____ Irrational _____ Is voice familiar _____

If so, who did it sound like: _____

Other Voice characteristics: _____

Background or Other Noises: _____

REMARKS: _____

Completed by: _____ Phone: _____

UW Madison Police Department
(608) 264-COPS (2677)

911

APPENDIX H

POSTAL BOMB THREAT

If a parcel is open and/or a threat is identified . . .

For a Bomb:

Evacuate Immediately
Call Police
Contact Postal Inspectors
Call Local Fire Department/HAZMAT Unit

For Radiological:

Limit Exposure - Don't Handle
Evacuate Area
Shield Yourself From Object
Call Police
Contact Postal Inspectors
Call Local Fire Department/HAZMAT Unit

For Biological or Chemical:

Isolate - Don't Handle
Evacuate Immediate Area
Wash Your Hands With Soap and Warm Water
Call Police
Contact Postal Inspectors
Call Local Fire Department/HAZMAT Unit
